Index to Volume 62

Author Index*

A

ABELMANN, WALTER H. (*See* Williams and Abelmann), 715

ABELS, JOHANNES, AND SCHILLING, ROBERT F. Protection of intrinsic factor by vitamin B_{12}, 853 (Abst.)

ADELSON, EDWARD, KAUFMAN, RICHARD M., LEAR, ARNOLD A., KIRBY, JAMES C., AND RHEINGOLD, JACK J. Physiology of platelet destruction as revealed by tagging of cohorts. I. Studies in dogs, 385

AFONSO, SKODA. (*See* Rowe, Afonso, Lugo, Castillo, Boake, and Crumpton), 1010 (Abst.)

AHO, IMPI. (*See* Lavender, Aho, and Pullman), 991 (Abst.)

ALAUPOVIC, PETAR. (*See* Furman, Howard, Brusco, and Alaupovic), 876 (Abst.)

ALEXANDER, CARL S., AND HUNT, VINCENT R. Evidence against immune mechanism in aminonucleoside nephrosis in rats, 103

—, NAGASAWA, HERBERT T., AND DICKIE, NESTOR. Mechanism of aminonucleoside nephrosis in rats, 853 (Abst.)

ALLEN, E. WILLIAM. (*See* Seltzer and Allen), 1014 (Abst.)

ALLEN, J. GARROTT. Observations on the prophylactic value against serum hepatitis of frequently administered transfusions of nonicterogenic convalescent plasma, 854 (Abst.)

ALLEN, JAMES C. Immunofluorescence applied to protein solutions, 517

ALVING, ALF S. (*See* Powell, DeGowin, and Alving), 1002 (Abst.)

AMARAL E. (*See* Sharp, Sweany, Henry, Pietras, Meadows, and Amaral), 1015 (Abst.)

ANIGIAN, MICHAEL J. (*See* Burns, Gehrke, Anigian, and Langley), 646

ARCHAMBAULT, MAUREEN. (*See* Sorensen and Archambault), 330

ARGERICH, TEODORO C. (*See* Rodriguez Garay and Argerich), 141

ARIMURA, GRACE K. (*See* Yunis, Arimura, and Kipnis), 465

ARMENTROUT, STEVEN. (*See* Weisberger, Wolfe, and Armentrout), 1020 (Abst).

ARMSTRONG, MARK L. Salt-induced hypercholesterolemia, 854 (Abst.)

ATWATER, JEAN. (*See* Erslev and Atwater), 401

AUBRY, RICHARD H. (*See* Nankin, Aubry, Moses, and Streeten), 997 (Abst.)

AUSE, MARTHA. (*See* Davidson, Sackner, and Davidson), 501

AWAI, KOZE, AND HENNES, ALLEN R. In vitro lipid metabolism in patients with uncontrolled insulin-dependent diabetes, 855 (Abst.)

AZEN, E. A., AND SCHILLING, R. F. Role of the spleen in acetylphenylhydrazine (APH) anemia in rats, 59

B

BADER, MORTIMER E., BADER, RICHARD A., TEIRSTEIN, ALVIN S., GOLUB, JAMES, MILLER, ALBERT, AND GOTTLIEB, ARLAN J. Changes in lung volumes during breathing negative pressure continuously, during inspiration only, and during expiration only, 31

BADER, RICHARD A. (*See* Bader, Bader, Teirstein, Golub, Miller, and Gottlieb), 31

BAILEY, JAMES A. (*See* Brinkley, Bailey, and Mendelson), 286

BALCHUM, OSCAR J. (*See* Levey and Balchum), 247

BARBEE, ROBERT A., RANKIN, JOHN, AND DICKIE, HELEN A. Pathogenicity of specific glycopeptide antigens in farmer's lung, 856 (Abst.)

BARBORIAK, JOSEPH J. (*See* Kory, Barboriak, and Hamilton), 990 (Abst.)

BARNETT, JACK A., SOUDA, LONA L., AND SANFORD, JAY P. Persistence of immunologic competence against bacterial antigen in thymectomized rats, 856 (Abst.)

BARTHOLOMEW, LLOYD G. (*See* Schutt, Sprague, Bartholomew, and Cain), 1013 (Abst.)

*July, pp. 1-174; August, pp. 175-356; September, pp. 357-534; October, pp. 535-714; November, pp. 715-890; December, pp. 891-1056.

BASHOUR, F. A., MCCLELLAND, ROBERT, AND NAFRAWI, ADEL. Effects of angiotensin on splanchnic circulation and liver in dogs, 857 (Abst.)

BAXTER, JOHN D. (*See* Pellegrino, Baxter, and Biltz), 999 (Abst.)

BECK, PAUL, KOUMANS, JAN H. T., WINTERLING, CHARLES A., STEIN, MARTIN F. DAUGHADAY, WILLIAM H., AND KIPNIS, DAVID M. Hormonal and metabolic changes during total starvation in obese subjects, 857 (Abst.)

BECKTEL, JACK M. Bioassay by use of dose-response relationships having curvature, 858 (Abst.)

BEDELL, GEORGE N., AND SEEBOHM, PAUL M. Primary pulmonary emphysema in middle-aged women, 858 (Abst.)

BELL, J. W. (*See* Parrish, Bray, Strandness, and Bell), 943

BENKEL, PATRICIA. (*See* Feldman, Benkel, and Nayak), 437

BERCU, BERNARD, AND HEINZ, JOHN. Percutaneous myocardial biopsy, 859 (Abst.)

BERNSTEIN, LIONEL M., MORRIS, ALAN H., AND SHAPIRO, THOMAS. Alteration of peripheral vascular resistance by changing force of cardiac contraction, 859 (Abst.)

BEST, WILLIAM R., PISCIOTTA, ANTHONY V. DONNELLY, WILLIAM J., FOWLER, WILLIS M., LINMAN, JAMES W., SCHWARTZ, STEVEN O., AND LOUIS, JOHN. Diagnosis and course of multiple myeloma, with survival estimations, 860 (Abst.)

BETTS, ANTHONY. (*See* Rigby, Betts, Hackett, Emerson, and Friedell), 216

BEUTLER, E., AND DURON, O. Effect of temperature and hydrogen ion concentrations on the preservation of erythrocyte adenosine triphosphate (ATP), 860 (Abst.)

BIKERMAN, VALENTINE. (*See* Levitan, Bikerman, Burrows, and Ingelfinger), 639

BILTZ, ROBERT M. (*See* Pellegrino, Baxter, and Biltz), 999 (Abst.)

BING, RICHARD J. (*See* Zaleski, Chiba, Yamanaka, and Bing), 1023 (Abst.)

BINGHAM, MARGARET. (*See* Evans, Bingham, and Weiser), 559

BIRCHER, JOHANNES, MANN, CHARLES V., CARLSON, HARLEY C., CODE, CHARLES F., AND ROVELSTAD, RANDOLPH A. Intraluminal and juxtamucosal duodenal pH, 861 (Abst.)

BLACK, ARNOLD B. (*See* West, Poske, Black, Pilz, and Zimmerman), 175

BLISS, HARRY A., FISHMAN, WILLIAM E., AND SMITH, PHILIP M. Effect of alterations of blood pH on digitalis toxicity, 53

BLOCK, WALTER D. (*See* Jackson and Block), 887 (Abst.)

BLUMBERG, B. S. (*See* Robinson, Blumberg, Pierce, Cooper, and Hames), 762

BLUMENTHAL, HERMAN T. (*See* Hirata and Blumenthal), 683

BOAKE, WILLIAM C. (*See* Rowe, Afonso, Lugo, Castillo, Boake, and Crumpton), 1010 (Abst.)

BOKKENHEUSER, V. (*See* Shumway, Bokkenheuser, Pollock, and Neter), 600

BOLINGER, ROBERT E., MONROE, MARY L., AND MORRIS, J. HAROLD. Effect of starvation on urinary fat metabolizing activity (FMA), 861 (Abst.)

BONDURANT, STUART. (*See* Dunkin, Mandelbaum, and Bondurant), 874 (Abst.)

BONDY, PHILIP K. (*See* Hollingsworth, Dillard, and Bondy), 346

BONORRIS, GEORGE. (*See* Katz, Bonorris, and Sellers), 910

BORUN, E. RAYMOND. Some differences in erythrocyte composition and uptake of radioactive potassium, sodium, chromate, and triiodothyronine associated with in vivo aging, 263

BOTTICELLI, JAMES T., AND LANGE, RAMON L. Effects of angiotensin administration on sodium and water excretion in adrenalectomized and oophorectomized patients, 862 (Abst.)

BOTTIGLIERI, NICHOLAS G., AND PALMER, EDDY D. Technique for gastroscopic examination of rats, 842

BOWIE, E. J. WALTER, THOMPSON, JOHN H., JR., PASCUZZI, CHRIS A., AND OWEN, CHARLES A., JR. Thrombosis in systemic lupus erythematosus despite circulating anticoagulants, 416

BRAND, ALTA. (*See* Noah and Brand), 506

BRAY, ROBERT A. (*See* Parrish, Bray, Strandness, and Bell), 943

BREGANT, ROBERT E. (*See* Burns, Bregant, VanPeenan, and Hood), 863 (Abst.)

BREWER, GEORGE J. (*See* Dern, Glynn, and Brewer), 319

BRICKER, NEAL S. (*See* Rieselbach, Todd, Rosenthal, and Bricker), 1008 (Abst.)

BRIDGES, ROBERT A. (*See* Gonyea and Bridges), 877 (Abst.)

BRINKLEY, FLOYD B., BAILEY, JAMES A., AND MENDELSON, JANICE A. Comparative duration of the antibacterial effect of topical penicillin and mafenide on experimental wounds, 286

BROUN, G. O., MIER, THOMAS, SCHMIDT, ROSE R., OLIGSCHLAGER, DOLORES, AND SCHULZ, IRENE. Relationship of influenza antibody pattern of the cord serum of the newborn to that of maternal and paternal serum, 862 (Abst.)

BROWN, ELMER B., AND ROTHER, MARY L. Studies of the mechanism of iron absorption. I. Iron uptake by the normal rat, 357

— and —. Studies of the mechanism of iron absorption. II. Influence of iron deficiency and other conditions on iron uptake by rats, 804

—. (*See* Hwang and Brown), 885 (Abst.)

BROWN, IMOGENE. (*See* Waisbren and Brown), 1020 (Abst.)

BROWN, ROBERT W. (*See* Manning, Waxman, Brown, and Thorning), 994 (Abst.)
BROWN, W. JANN. (*See* Verity and Brown), 846
BRUSCO, OSVALDO J. (*See* Furman, Howard, Brusco, and Alaupovic), 876 (Abst.)
BUHLER, DONALD R., AND IHLER, G. S. Effect of plasma from normal and schizophrenic subjects on the oxidation of labeled glucose by chicken erythrocytes, 306
BURCH, G. E. (*See* Hyman, DePasquale, and Burch), 886 (Abst.)
BURMESTER, B. R. (*See* Peterson, Burmester, Fredrickson, and Good), 1000 (Abst.)
BURNS, THOMAS W., BREGANT, ROBERT E., VANPEENAN, HUBERT J., AND HOOD, TONY E. Observations on the blood glucose concentration of human subjects by use of a continuous sampling technique, 863 (Abst.)
—, GEHRKE, CHARLES W., ANIGIAN, MICHAEL J., AND LANGLEY, PAUL E. Effect of insulin on plasma free fatty acids of normal subjects, 646
BURROWS, BELTON A. (*See* Levitan, Bikerman, Burrows, and Ingelfinger), 639
BYERS, E. H., AND WILSON, R. H. Tumorigenesis inhibition in C_3H mice, 864 (Abst.)

Subject Index*

A

Acetylation, sulfadiazine, genetically controlled, in rabbit livers, possible identification of heterozygous trait, 905

Acetylcholine, renal arterial infusion, saliuresis and diuresis induced by, 991 (Abst.)

Acetylphenylhydrazine (APH) anemia in rats, role of spleen in, 59

Acid deoxyribonuclease from mouse spleen, digestion of calf thymus deoxyribonucleic acid by, 885 (Abst.)

Adaptive capacity of residual nephrons of chronically diseased kidney in dog, 1008 (Abst.)

Adenosine triphosphate, erythrocyte, preservation, effect of temperature and hydrogen ion concentration on, 860 (Abst.)

Adipose tissue, role in glucose tolerance in rats, 993 (Abst.)

Adrenalectomized and oophorectomized patients, sodium and water excretion in, effects of angiotensin administration on, 862 (Abst.)

Aerogenic infection with Rocky Mountain spotted fever, 1011 (Abst.)

Age and pathologic conditions, relation of shrinkage temperature and isometric contraction of skin collagen to, 1006 (Abst.)

weight gain, and ovarian function, physiologic factors influencing circulating triglyceride concentration in women, 437

Agranulocytosis, limited proliferative potential as factor in, 1000 (Abst.)

Alanine:cycloserine antagonism, quantitative aspects and relation to culture media heating, 657

Albumin metabolism in aminonucleoside nephrotic rats, 910

Allergy, penicillin, human, comparison of various penicilloyl-polylysines, 482

Amine oxidase in normal serum, 766

release by thrombin, 871 (Abst.)

Amino acid transport in blood cells, effect of cations on amino acid transport in human leukocytes, 465

utilization, influence of progesterone on, 991 (Abst.)

Aminonucleoside nephrosis, kidneys of rats with, correlation of ultrastructure and enzyme activities in, 996 (Abst.)

in rats, evidence against immune mechanism in, 103

mechanism, 853 (Abst.)

metabolism of albumin in, 910

β-Aminoproprionitrile, inhibition of collagen aggregation in rat cartilage induced by, 407

Anemia, acetylphenylhydrazine (APH), in rats, role of spleen in, 59

acquired and constitutional, morphologic and biochemical characteristics of erythrocytes in testosterone-induced remission in, 294

hepatosplenomegaly, dwarfism, and hypogonadism syndrome, urinary zinc excretion in, 591

of malignancy, effect of Freund's adjuvant and colloidal carbon on erythroagglutination reaction, 216

sickle cell, serum benzidine-positive pigments in, 950

theory of cause of crises in, 883 (Abst.)

Angioneurotic edema, hereditary, activation of C'1-esterase in, 873 (Abst.)

Angiotensin, effects of administration on sodium and water excretion in adrenalectomized and oophorectomized patients, 862 (Abst.)

on splanchnic circulation and liver in dogs, 857 (Abst.)

infusion test, clinical application, 890 (Abst.)

Ankylosing spondylitis, lung and thoracic compliances in, 1015 (Abst.)

Anthrone method for determination of inulin in clearance studies, simplification, 351

*July, pp. 1-174; August, pp. 175-356; September, pp. 357-534; October, pp. 535-714; November, pp. 715-890; December, pp. 891-1056.

Antibacterial effect of topical penicillin and mafenide on experimental wounds, comparative duration, 286
Antibiotics, wide-spectrum, inhibition of *Escherichia coli* bactericidal rate of human sera by, 1020 (Abst.)
Antibody(ies), competitive, elution for enhancement of sensitized erythrocyte survival, 869 (Abst.)
to DNA, specific nuclear reaction pattern in lupus erythematosus sera, 625
fluorescent, demonstration of serum proteins on washed leukocytes by means of, 18
technique applied to rapid diagnosis of sporotrichosis, 835
insulin-binding, precipitating, demonstration in sera of insulin-treated guinea pigs and rabbits, 683
pattern, influenza, of cord serum of newborn, relationship to that of maternal and paternal serum, 862 (Abst.)
response to rhinovirus infections, 868 (Abst.)
Antibody-producing capacity, decreased, in mice, during incubation period of passage A lymphatic leukemia, 878 (Abst.)
Anticellular serum, effect on phagocytosis and nucleic acid synthesis by HeLa cells, 864 (Abst.)
Anticoagulants, circulating, thrombosis in systemic lupus erythematosus despite, 416
Antidiuretic hormone in plasma, method for assay, 279
titer of human plasma, 279
Antigen(s), bacterial, immunologic competence against, in thymectomized rats, 856 (Abst.)
modified erythrocytes (Cr^{51}-labeled), survival in immune and nonimmune rabbits, 600
glycopeptide, pathogenicity in farmer's lung, 856 (Abst.)
Antinuclear globulin, autoantibody-like, in A/J mice, 875 (Abst.)
Aortic stenosis, supravalvar, genetic and clinical studies, 995 (Abst.)
valve disease, systemic and coronary hemodynamics in, 1010 (Abst.)
wall, serum lipoproteins and cholesterol deposition in, of cholesterol-fed chick, 889 (Abst.)
APH (acetylphenylhydrazine) anemia in rats, role of spleen in, 59
Arterial blood carbon dioxide tension and plasma unesterified fatty acids, 990 (Abst.)
infusion, renal, saliuresis and diuresis induced by, 991 (Abst.)
and venous tissue, human, transketolase activity, 989 (Abst.)
Artery, bronchial, blood flow in intact animals, 866 (Abst.)
sinus node, mechanism of action of quinidine on sinus node studied by direct perfusion through, 888 (Abst.)
Atherosclerosis, human, pathogenesis of intimal fatty streak lesion, alteration of neutral lipids, 886 (Abst.)
ATP, reduced ability of mitochondria isolated from patients with cirrhosis to synthesize, 184
Atrial and ventricular, left, sound and pressure relationships in mitral stenosis with sinus rhythm, 1022 (Abst.)
Autoantibody-like antinuclear globulin in A/J mice, 875 (Abst.)
Automatic chemical analysis, determination of D-xylose in urine by, 341
Autonomic blockade, effect on pulmonary hemodynamics in chronic lung disease, 1012 (Abst.)

B

Bacterial antigen, immunologic competence against, in thymectomized rats, 856 (Abst.)
modified erythrocytes (Cr^{51}-labeled), survival in immune and nonimmune rabbits, 600
Bactericidal rate of *Escherichia coli* of human sera, inhibition by wide-spectrum antibiotics, 1020 (Abst.)
Bacteriuria and urinary tract infection, incidence in women with diabetes, 997 (Abst.)
Basement membrane, glomerular, human, and Freund's adjuvant, glomerulonephritis induced in newborn lambs by injections, 1016 (Abst.)
Benzidine-positive pigments, serum, in sickle cell anemia, 950
Beta cell, biochemical inertia as primary lesion in diabetes mellitus, evidence, 1014 (Abst.)
Bile secretion and biliary ductules, 608
serum, and urine, fluorometric determination of biliverdin in, 141
Biliary ductules and bile secretion, 608
reabsorption of C^{14}-bilirubin, 998 (Abst.)
Bilirubin (C^{14}-labeled), biliary reabsorption, 998 (Abst.)
Biliverdin in serum, bile, and urine, fluorometric determination, 141
Bioassay by use of dose-response relationships having curvature, 858 (Abst.)
Biochemical inertia of beta cell as primary lesion in diabetes mellitus, evidence, 1014 (Abst.)
Biopsy, myocardial, percutaneous, 859 (Abst.)
needle, hepatic, application of rapid micromethod for glycogen to, 846
Bleeding disorder, familial, defective fibrinase in, 881 (Abst.)
Blood, arterial, carbon dioxide tension and plasma unesterified fatty acids, 990 (Abst.)
cells, amino acid transport in, effect of cations on amino acid transport in human leukocytes, 465
red, transfused, survival, hemolytic system associated with enteritis in rabbits, 559
flow, bronchial artery, in intact animals, 866 (Abst.)

Blood flow—Cont'd
coronary, to right atrium and ventricle, increase in, in response to acute increase in hemodynamic load, 72
glucose concentration, continuous sampling technique for, 863 (Abst.)
levels of diamine oxidase as pregnancy test, 699
mouse, isolation of leukocytes from, 985
pH, effect of alterations on digitalis toxicity, 53
pressure, systolic, of rats, factors affecting indirect determination, 223
proteins, inherited variants, familial segregation of transferrin B_{1-2} B_2, 762
and urine containing inulin, use of gel filtration to remove chemically interfering glucose from, 501
Body fluid constituents, urine sulfate, use of radioisotopes to measure, 710
tissues and fluids, quantitative determination of *d*-tubocurarine in, 979
Bone, chemical and physiologic state of carbontate in, 999 (Abst.)
collagen synthesis in, factors affecting, 889 (Abst.)
Breathing negative pressure continuously, changes in lung volumes during inspiration only, and during expiration only, 31
Bromsulphalein (BSP) conjugation and excretion, impairment in fetus, 1012 (Abst.)
Bronchial artery blood flow in intact animals, 866 (Abst.)
cartilage, human, from aged and diseased lungs, hexosamine and hydroxyproline content in, 78
Bronchogenic carcinoma, diagnosis based on tetracycline fluorescence of gastric washings, 992 (Abst.)
metastasis, identification of two hormones in, concept of tumor as hormone "sponge," 1018 (Abst.)
BSP conjugation and excretion, impairment in fetus, 1012 (Abst.)
Bursa of Fabricius, surgical removal, prevention of lymphatic leukemia in chicken by, 1000 (Abst.)
Busulfan, cytolytic effect on circulating leukocytes, 1019 (Abst.)

C

C^{14}-bilirubin, biliary reabsorption, 998 (Abst.)
C'1-esterase, activation in hereditary angioneurotic edema, 873 (Abst.)
CAI^{131}, study of reticuloendothelial system with, 968
Calcium, dietary, relation of radiocalcium absorption to, 989 (Abst.)
kinetics, normal, application of newly derived composite reference standard, 882 (Abst.)
Carbohydrate metabolism in patients with cirrhosis, 994 (Abst.)
Carbohydrate-induced hyperlipidemia, 888 (Abst.)
Carbon, colloidal and Freund's adjuvant, effect on erythroagglutination reaction, experimental studies in anemia of malignancy, 216
dioxide tension, arterial blood, and plasma unesterified acids, 990 (Abst.)
monoxide inhalation, effects on cardiopulmonary responses of nonsmokers to exercise, 867 (Abst.)
Carbonate, chemical and physiologic state in bone and other mineralized tissues, 999 (Abst.)
Carcinoma, bronchogenic, diagnosis based on tetracycline fluorescence of gastric washings, 992 (Abst.)
Cardiac contraction, changing force, alteration of peripheral vascular resistance by, 859 (Abst.)
Cardiomegaly, experimental, nucleic acid and protein determinations in, 632
Cardiopulmonary responses of nonsmokers to exercise, effects of carbon monoxide inhalation on, 867 (Abst.)
Cartilage, human bronchial, from aged and diseased lungs, hexosamine and hydroxyproline content in, 78
Cations, effect on amino acid transport in human leukocytes, 465
Cellular ions and metabolites, enzyme inhibition at levels found in severely malnourished children, 995 (Abst.)
Cellulose acetate electrophoresis, membrane, rapid measurement of hemoglobin A_2 by, 692
preliminary immunoelectrophoretic analysis of paralbuminemia, 753
Chloramphenicol, inhibitory effect on mammalian ribosomes, inhibition of induced ribosomal protein synthesis, 1020 (Abst.)
Cholesterol deposition and serum lipoproteins in aortic wall of cholesterol-fed chick, 889 (Abst.)
Cholinergic stimulation, selective, and blockade of sinus node by direct perfusion through its artery, 40
Chromate, potassium, sodium, and triiodothyronine, radioactive, some differences in erythrocyte composition and uptake associated with aging, 263
Chromatography, column, and immunoelectrophoretic analysis, normal urinary proteins and mucoproteins, 878 (Abst.)
paper, ion-exchange, of thyroid hormones, 831
thin-layer, separation of iodoamino acids and related compounds by, 346
Circulation, coronary collateral, development, effect of chronic methemoglobinemia on, 874 (Abst.)
mesenteric and portal, of dogs, segmental resistance, local effects of vasoactive agents on, 1016 (Abst.)
retinal, fluorescence motion picture photography of, technique, and description of normal retinal blood flow, 703

Cirrhosis, patients with, carbohydrate metabolism in, 994 (Abst.)
reduced ability of mitochondria isolated from liver tissue to synthesize ATP, 184
Cirrhotic and normal subjects, kinetics of reticuloendothelial system in, with colloidal denatured albumin labeled with I^{131}, 968
Clearance studies, simplification of anthrone method for determination of inulin in, 351
Colitis, ulcerative, persistence of serum complement in sera of patients with, 24
Collagen aggregation in rat cartilage, inhibition by beta amino proprionitrile, 407
skin, shrinkage temperature and isometric contraction, in relation to age and pathologic conditions, 1006 (Abst.)
synthesis in bone, factors affecting, 889 (Abst.)
Collateral circulation, coronary, development, effect of chronic methemoglobinemia on, 874 (Abst.)
Colloidal denatured albumin, study of reticuloendothelial system with, 968
Colorimetric method for measurement of isocitric dehydrogenase activity, 148
Column chromatography and immunoelectrophoretic analysis, normal urinary proteins and mucoproteins, 878 (Abst.)
Complement, inhibition by polyinosinic acid, 1022 (Abst.)
Composite reference standard, newly derived, normal calcium kinetics, 882 (Abst.)
Connective tissue disease, plasma free and platelet-bound serotonin levels in, platelet-serotonin–binding mechanism, 870 (Abst.)
Coronary blood flow to right atrium and ventricle, increase in response to acute increase in hemodynamic load, 72
collateral circulation, development, effect of chronic methemoglobinemia on, 874 (Abst.)
and systemic hemodynamics in aortic valve disease, 1010 (Abst.)
Corpuscular hemoglobin concentration, mean, effect of viscosity, 401
Cortisol, early effect on glucose metabolism in man, 431
Creatine, glycogen, and high-energy phosphate in human muscle disease, 579
Creatine kinase, improved method for determination, 159
Culture media heating, relation to quantitative aspects of alanine: cycloserine antagonism, 657
Cyclophosphamide therapy, analysis, treatment of multiple myeloma, 990 (Abst.)
Cycloserine: alanine antagonism, quantitative aspects and relation to culture media heating, 657
Cytolytic effect of busulfan on circulating leukocytes, 1019 (Abst.)
Cytopathic viruses, disc method for identification and titration, and detection of antibodies resulting from their infection, 525
Cytoxan therapy, analysis, treatment of multiple myeloma, 990 (Abst.)

D

Death in infancy, sudden unexpected, and milk sensitivity, 477
Deoxyribonucleic acid of calf thymus, digestion by acid deoxyribonuclease (DNase II) from mouse spleen, 885 (Abst.)
Desferrioxamine, effects on human iron absorption and excretion, 885 (Abst.)
Detoxification of *Escherichia coli* lipopolysaccharide by splenic extract, 881 (Abst.)
Diabetes, insulin-dependent, uncontrolled, lipid metabolism in, 855 (Abst.)
mellitus, evidence that primary lesion is biochemical inertia of beta cell, 1014 (Abst.)
patients with, and normal subjects, insulin-like activity in serum protein fractions before and after glucose loading, 1003 (Abst.)
women with, incidence of bacteriuria and urinary tract infection in, 997 (Abst.)
Diamine oxidase blood levels as pregnancy test, 699
Dicumarol, mode of action, 877 (Abst.)
Dietary calcium, relation of radiocalcium absorption to, 989 (Abst.)
fat–induced hyperglyceridemia, effects of medium chain-length triglycerides on, 876 (Abst.)
Digestion of calf thymus deoxyribonucleic acid by acid deoxyribonuclease (DNase II) from mouse spleen, 885 (Abst.)
Digitalis toxicity, effect of alterations of blood pH on, 53
Digoxin intoxication, protective effect of hypothermia in, 884 (Abst.)
Diuresis and saliuresis induced by renal arterial infusion of acetylcholine, 991 (Abst.)
steroid-induced, in nephrotic syndrome, physiologic responses associated with, 449
DNA, antibody to, specific nuclear reaction pattern in lupus erythematosus sera, 625
synthesis, fate of cultured leukocytes already in, from patients with infectious mononucleosis, 993 (Abst.)
DNase II from mouse spleen, digestion of calf thymus deoxyribonucleic acid by, 885 (Abst.)
Dose-response relationships having curvature, bioassay by, 858 (Abst.)
Duodenal pH, intraluminal and juxtamucosal, 861 (Abst.)
Dwarfism, anemia, hepatosplenomegaly, and hypogonadism syndrome, urinary zinc excretion in, 591

E

Ear drum, mobility, 888 (Abst.)
Edema, hereditary angioneurotic, activation of C'1-esterase in, 873 (Abst.)
Electrophoresis, cellulose acetate membrane, rapid measurement of hemoglobin A_2 by, 692
and paper, and preliminary immunoelectrophoretic analysis of paralbuminemia, 753
paper, high-voltage, adaptation for rapid identification of mono- and oligosaccharides, 817
identification of pancreatic juice components by, 867
Electrophoretic migration of lactic dehydrogenase isozymes, 571
Ellagic acid, activation of Hageman factor by, 1006 (Abst.)
Emphysema, pulmonary, primary, in middle-aged women, 858 (Abst.)
End-diastolic pressure, left ventricular, in pure mitral stenosis, effect of exercise on, 875 (Abst.)
state, left ventricular, in man, 865 (Abst.)
Enteritis, hemolytic system associated with, in rabbits, survival of transfused red cells, 559
Enterococcal infection in nonobstructed kidney of rat, observations on treatment, 90
Enzyme activity in synovial fluid, 175
and ultrastructure in kidneys of rats with aminonucleoside nephrosis, correlation, 996 (Abst.)
inhibition at levels of cellular ions and metabolites found in severely malnourished children, 995 (Abst.)
in treatment of acute experimental pancreatitis, 1013 (Abst.)
Epithelial cells, renal, formation of lipid-protein complexes in, in protein reabsorption, 1001 (Abst.)
Erysipelothrix insidiosa and *Listeria monocytogenes*, immunofluorescent studies, 935
Erythrocytes, adenosine triphosphate preservation, effect of temperature and hydrogen ion concentration on, 860 (Abst.)
chicken, oxidation of labeled glucose by, effect of plasma from normal and schizophrenic subjects on, 306
composition and uptake of radioactive potassium, sodium, chromate, and triiodothyronine, some differences associated with aging, 263
Cr^{51}-labeled, modified by bacterial antigen, survival in immune and nonimmune rabbits, 600
glycolysis, measurement standardization, 616
lipids, comparison of normal young and normal old populations, 394
morphologic and biochemical characteristics in testosterone-induced remission in acquired and aplastic anemia, 294
sensitized, enhancement of survival by competitive antibody elution, 869 (Abst.)
Erythropoietic response to short periods of hypoxia, quantitative aspects of hormone production, 880 (Abst.)
Erythropoietin standardization and assay, use of hypoxia-induced polycythemic mouse in, 743
Esophagus in rumination, 1021 (Abst.)
Escherichia coli, inhibition of bactericidal rate of human sera by wide-spectrum antibiotics, 1020 (Abst.)
lipopolysaccharides, detoxification by splenic extract, 881 (Abst.)
Ethanol, effects on plasma lipids, 675
Excretion, tubular, renal hemodynamics, and urine-concentrating capacity in essential hypertension, 787
urinary, of zinc in syndrome of anemia, hepatosplenomegaly, dwarfism, and hypogonadism, 591
Exercise, effect on left ventricular end-diastolic pressure in pure mitral stenosis, 875 (Abst.)
limitation following extensive pulmonary resection, 871 (Abst.)
Expiration only, changes in lung volumes during breathing negative pressure continuously during, and during inspiration only, 31
Expired air, metabolic products in, methane, 247
Extrapancreatic mechanism for insulin release, 877 (Abst.)

F

Familial bleeding disorder, defective fibrinase in, 881 (Abst.)
hyperlipemia (hyperchylomicronemia), effects of medium chain-length triglycerides on, 876 (Abst.)
Farmer's lung, pathogenicity of glycopeptide antigens in, 856 (Abst.)
Fat metabolizing activity, urinary, effect of starvation on, 861 (Abst.)
and nitrogen fecal excretion in Wilson's disease (hepatolenticular degeneration), intake-excretion studies, 879 Abst.)
Fatty acids, injections, structure of thrombi produced by, 884 (Abst.)
plasma, unesterified, and arterial blood carbon dioxide tension, 990 (Abst.)
streak lesion, of human atherosclerosis, pathogenesis, alteration of neutral lipids, 886 (Abst.)
Fecal excretion of fat and nitrogen in Wilson's disease (hepatolenticular degeneration), intake-excretion studies, 879 (Abst.)
Fibrin monomer, fibrinogen, and fibrin-stabilizing factor, flow-dependent structural behavior, 865 (Abst.)
Fibrinase, defective, in familial bleeding disorder, 881 (Abst.)
Fibrinogen, fibrin monomer, and fibrin-stabilizing factor, flow-dependent structural behavior 865 (Abst.)
subfractions, preparation and analysis, 663

Fibroblasts, human, modulation of molecular character of hyaluronic acid by, 866 (Abst.)
Fluids and tissues, body, quantitative determination of *d*-tubocurarine in, 979
Fluorescence microscopy, reticulocyte counts by means of, 132
motion picture photography of retinal circulation, technique and normal retinal blood flow, 703
tetracycline, of gastric washings, diagnosis of bronchogenic carcinoma based on, 992 (Abst.)
Fluorescent antibodies, demonstration of serum proteins on washed leukocytes by means of, 18
technique, application to rapid diagnosis of sporotrichosis, 835
Fluorometric determination of biliverdin in serum, bile, and urine, 141
Freund's adjuvant and colloidal carbon, effect of erythroagglutination reaction, experimental studies in anemia malignancy, 216
and human glomerular basement membrane, glomerulonephritis induced in newborn lambs by injections, 1016 (Abst.)

G

Gantrisin absorption, rectosigmoidal, in normal subjects and ulcerative colitis patients, 639
Gastric pathologic conditions, clinical value of Japanese gastrocamera for diagnosis, 996 (Abst.)
washings, tetracycline fluorescence, diagnosis of bronchogenic carcinoma based on, 992 (Abst.)
Gastrocamera, Japanese, clinical value for diagnosis of gastric pathologic conditions, 996 (Abst.)
Gastroscopic examination of rats, technique, 842
Gel filtration, use to remove chemically interfering glucose from blood and urine containing inulin, 501
Genetic and clinical studies of supravalvar aortic stenosis, 995 (Abst.)
control of sulfadiazine and isoniazid metabolism in rabbit, 891
Genetically controlled sulfadiazine acetylation in rabbit livers, possible identification of heterozygous trait, 905
Globin synthesis in human reticulocytes, 121
Globulin, antinuclear, autoantibody-like, in A/J mice, 875 (Abst.)
α-Globulin, metabolism of normal 6.6S, in normal subjects and in patients with macroglobulinemia and multiple myeloma, 1
Glomerular basement membrane, human, and Freund's adjuvant, glomerulonephritis induced in newborn lambs by injections, 1016 (Abst.)
Glomerulonephritis induced in newborn lambs by injections of human glomerular basement membrane and Freund's adjuvant, 1016 (Abst.)
Glucokinase, hepatic, direct effect of insulin on, 1019 (Abst.)
Glucose, chemically interfering, use of gel filtration to remove from blood and urine containing inulin, 501
concentration, blood, continuous sampling technique for, 863 (Abst.)
loading, insulin-like activity in serum protein fractions of diabetic and normal subjects before and after, 1003 (Abst.)
metabolism in man, early effect of cortisol on, 431
oxidation of labeled, by chicken erythrocytes, effect of plasma from normal and schizophrenic patients on, 306
tolerance in rats, role of adipose tissue in, 993 (Abst.)
Glucose-6-phosphate dehydrogenase deficiency, studies on correlation with behavioral manifestations in schizophrenia, 319
Glycogen, creatine, and high-energy phosphate in human muscle disease, 579
rapid micromethod for, application to hepatic needle biopsies, 846
Glycolysis of erythrocytes, measurement standardization, 616
Glycopeptide antigens, pathogenicity in farmer's lung, 856 (Abst.)
Glycoprotein fractions of plasma and leukemic leukocytes, comparative analysis, 961

H

H substance of normoblasts, megakaryocytes, and platelets, 1023 (Abst.)
Hageman factor, activation by solutions of ellagic acid, 1006 (Abst.)
Heart, protein metabolism in, following myocardial infarction, 880 (Abst.)
HeLa cells, phagocytosis and nucleic acid synthesis by, effect of anticellular serum on, 864 (Abst.)
Hemin and hemoglobin, C^{14}-labeled, liquid scintillation counting by modified Schöniger technique, 511
Hemodynamic effects, acute local and systemic, of hypertonicity, 876 (Abst.)
load, increase in coronary blood flow to right atrium and ventricle in response to acute increase in, 72
Hemodynamics, coronary and systemic, in aortic valve disease, 1010 (Abst.)
pulmonary, effect of autonomic blockade on, in chronic lung disease, 1012 (Abst.)
renal, tubular excretion, and urine-concentrating capacity in essential hypertension, 787
Hemoglobin A_2, rapid measurement by cellulose acetate membrane electrophoresis, 692
concentration, mean corpuscular, effect on viscosity, 401
and hemin, C^{14}-labeled, liquid scintillation counting by modified Schöniger technique, 511
Pylos–hemoglobin S combination, 193

Hemolysis, intravascular, and reticuloendothelial system, role in production of hypercoagulable state, 1005 (Abst.)
nitrofurantoin-induced, 1002 (Abst.)
Hemolytic system associated with enteritis in rabbits, survival of transfused red cells, 559
Hemorrhagic shock, reversible and irreversible, and transfusion, function of pulmonary veins in, 886 (Abst.)
Hemostatic screening, 1004 (Abst.)
Hepatic glucokinase, direct effect of insulin on, 1019 (Abst.)
needle biopsies, application of rapid micromethod for glycogen to, 846
Hepatitis, serum, prophylactic value against, of transfusions of nonicterogenic convalescent plasma, 854 (Abst.)
Hepatolenticular degeneration (Wilson's disease), fecal excretion of fat and nitrogen in, intake-excretion studies, 879 (Abst.)
Hepatosplenomegaly, anemia, dwarfism, and hypogonadism syndrome, urinary zinc excretion in, 591
Hereditary angioneurotic edema, activation of C'1-esterase in, 873 (Abst.)
factors in systemic lupus erythematosus, 1001 (Abst.)
Herpes simplex infection of mice, biologic significance of viruria studied with, 1013 (Abst.)
Heterozygous trait for sulfadiazine acetylation, possible identification, 905
Hexosamine and hydroxyproline content in human bronchial cartilage from aged and diseased lungs, 78
Histamine in human plasma, simplified micromethod for measuring, 506
Homograft rejection, mechanism, 1023 (Abst.)
Hormonal and metabolic changes of total starvation in obesity, 857 (Abst.)
Hormone(s), identification of two in bronchogenic metastasis, concept of tumor as hormone "sponge," 1018 (Abst.)
production, quantitative aspects, erythropoietic response to short periods of hypoxia, 880 (Abst.)
"sponge," concept of tumor as, identification of two hormones in bronchogenic metastasis, 1018 (Abst.)
thyroid, ion-exchange paper chromatography, 831
Hyaluronic acid, modulation of molecular character by human fibroblasts, 866 (Abst.)
Hydrocortisone, effect on osmolal threshold for vasopressin release in man, 997 (Abst.)
Hydrogen ion concentration and temperature, effect on erythrocyte adenosine triphosphate preservation, 860 (Abst.)
Hydroxyproline and hexosamine content in human bronchial cartilage from aged and diseased lungs, 78
5-Hydroxytryptamine-C^{14} platelet survival studies, 887 (Abst.)
Hypercholesterolemia, salt-induced, 854 (Abst.)
Hyperchylomicronemia (dietary fat–induced hyperglyceridemia), type of familial hyperlipemia, effects of medium chain-length triglycerides on, 876 (Abst.)
Hypercoagulable state, role of intravascular hemolysis and reticuloendothelial system in production, 1005 (Abst.)
Hyperglyceridemia, dietary fat–induced, effects of medium chain-length triglycerides on, 876 (Abst.)
Hyperlipemia, familial, effects of medium chain-length triglycerides on, 876 (Abst.)
Hyperlipidemia, carbohydrate-induced, 888 (Abst.)
Hypertension, essential, renal hemodynamics, tubular excretion, and urine-concentrating capacity in, 787
portal, portopulmonary shunts in, 715
renal and renoprival, 874 (Abst.)
Hypertonicity, acute local and systemic hemodynamic effects, 876 (Abst.)
Hypogonadism, anemia, hepatosplenomegaly, and dwarfism syndrome, urinary zinc excretion in, 591
Hypothermia, protective effect on Digoxin intoxication, 884 (Abst.)
Hypoxia, prevention by use of rocking bed in Pickwickian syndrome, 870 (Abst.)
short periods, erythropoietic response to, quantitative aspects of hormone production, 880 (Abst.)
Hypoxia-induced polycythemic mouse, use in assay and standardization of erythroproietin, 743

I

Immune mechanism in aminonucleoside nephrosis in rats, evidence against, 103
Immunity in experimental staphylococcal infections, 535
Immunoelectrophoretic analysis and column chromatography, normal urinary proteins and mucoproteins, 878 (Abst.)
preliminary, and paper and cellulose acetate electrophoresis of paralbuminemia, 753
Immunofluorescence applied to protein solutions, 517
Immunofluorescent studies of *Listeria monocytogenes* and *Erysipelothrix insidiosa*, 935
Immunogenicity of penicilloyl-polylysines, 998 (Abst.)
Immunologic aspects of radiation injury, 1003 (Abst.)
competence against bacterial antigen in thymectomized rats, 856 (Abst.)
differences in streptokinase, 872 (Abst.)
Incubation period of passage A lymphatic leukemia, decreased antibody-producing capacity during, 878 (Abst.)
Infancy, sudden unexpected death in, and milk sensitivity, 477

Infection(s), enterococcal, in nonobstructed kidney of rat, 90
pneumococcal, fatal, in rabbits, manifestations, 549
rhinovirus, antibody response to, 868 (Abst.)
staphylococcal, experimental, immunity in, 535
Infectious mononucleosis, patients with, fate of cultured leukocytes already in DNA synthesis from, 993 (Abst.)
treatment with steroids, 1018 (Abst.)
Influenza antibody pattern of cord serum of newborn, relationship to that of maternal and paternal serum, 862 (Abst.)
Infusions, intravenous, in small animals, apparatus for continuous long-term, 169
Inspiration only, changes in lung volumes during breathing negative pressure continuously during, and during expiration only, 31
Insulin, direct effect on hepatic glucokinase, 1019 (Abst.)
effect on plasma free fatty acids, 646
release, extrapancreatic mechanism for, 877 (Abst.)
Insulin-binding antibody, precipitating, demonstration in sera of insulin-treated guinea pigs and rabbits, 683
Insulin-dependent diabetes, uncontrolled, lipid metabolism in, 855 (Abst.)
Insulin-like activity in serum protein fractions of diabetic and normal subjects before and after glucose loading, 1003 (Abst.)
Intake-excretion studies, fecal excretion of fat and nitrogen in Wilson's disease, 879 (Abst.)
Intestine, small, kinetics of L-methionine absorption from, 1011 (Abst.)
mucosa, serial observations of structure in Whipple's disease, 1017 (Abst.)
Intimal fatty streak lesion of human atherosclerosis, pathogenesis, alteration of neutral lipids, 886 (Abst.)
Intraluminal and juxtamucosal duodenal pH, 861 (Abst.)
Intravascular hemolysis and reticuloendothelial system, role in production of hypercoagulable state, 1005 (Abst.)
Intravenous infusions, continuous long-term, in small animals, apparatus for, 169
Intrinsic factor, protection by vitamin B_{12}, 853 (Abst.)
Inulin, blood and urine containing, use of gel filtration to remove chemically interfering glucose from, 501
determination and clearance studies, simplification of anthrone method for, 351
Iodoamino acids and related compounds, separation by thin-layer chromatography, 346
Ion-exchange paper chromatography of thyroid hormones, 831
Ions and metabolites, cellular, enzyme inhibition at levels found in severely malnourished children, 995 (Abst.)
Iron absorption and excretion effects of desferrioxamine on, 885 (Abst.)
mechanism, influence of iron deficiency and other conditions on iron uptake by rats, 804
iron uptake by normal rat, 357
deficiency, influence on iron uptake by rats, 804
zinc, and nitrogen content of sweat in normal and deficient subjects, 84
Isocitric dehydrogenase activity, colorimetric method for measurement, 148
Isometric contraction and shrinkage temperature of skin collagen in relation to age and pathologic conditions, 1006 (Abst.)
Isoniazid and sulfadiazine metabolism in rabbit, genetic control, 891
Isozymes, lactic dehydrogenase, electrophoretic migration, 571

J

Japanese gastrocamera, clinical value for diagnosis of gastric pathologic conditions, 996 (Abst.)
Juxtamucosal and intraluminal duodenal pH, 861 (Abst.)

K

Kidney, chronically diseased, in dog, adaptive capacity of residual nephons, 1008 (Abst.)
of newborn human, isolation of latent virus from, 872 (Abst.)
nonobstructed, of rat, observations on treatment of enterococcal infection in, 90
of rats with aminonucleoside nephrosis, correlation of ultrastructure and enzyme activities, 996 (Abst.)
Kinetics of reticuloendothelial system in normal and cirrhotic subjects, with colloidal denatured albumin labeled with I^{131}, 968

L

Lactic dehydrogenase isozymes, electrophoretic migration, 571
Latent porphyrics, detection by quantitative determination of porphobilinogen excretion, 887 (Abst.)
Left ventricular end-diastolic pressure in pure mitral stenosis, effect of exercise on, 875 (Abst.)
state in man, 865 (Abst.)
Leukemia, lymphatic, passage A, incubation period, decreased antibody-producing capacity during, 878 (Abst.)
prevention in chicken by surgical removal of bursa of Fabricius, 1000 (Abst.)
Leukemic leukocytes and plasma, comparative analysis of glycoprotein fractions, 961

Leukocytes, circulating, cytolytic effect of busulfan on, 1019 (Abst.)
cultured, already in DNA synthesis, from patients with infectious mononucleosis, fate, 993 (Abst.)
human, effect of cations on amino acid transport in, 465
isolation from mouse blood, 985
washed, demonstration of serum proteins on, by means of fluorescent antibodies, 18
Lipid(s), erythrocyte, comparison of normal young and normal old populations, 394
metabolism in uncontrolled insulin-dependent diabetes, 855 (Abst.)
neutral, alteration, pathogenesis of intimal fatty streak lesion of human atherosclerosis, 886 (Abst.)
plasma, effects of ethanol on, 675
Lipid-protein complexes, formation in renal epithelial cells in protein reabsorption, 1001 (Abst.)
Lipopolysaccharide, *Escherichia coli*, detoxification by splenic extract, 881 (Abst.)
Lipoproteins, serum, and cholesterol deposition in aortic wall of cholesterol-fed chick, 889 (Abst.)
Liquid scintillation counting of C^{14}-labeled hemoglobin and hemin by modified Schöniger technique, 511
Listeria monocytogenes and *Erysipelothrix insidiosa*, immunofluorescent studies, 935
Liver, human, mitochondrial oxidase activities, 883 (Abst.)
pituitary regulation of testosterone metabolism by, 992 (Abst.)
rabbit, genetically controlled sulfadiazine acetylation in, possible identification of heterozygous trait, 905
and splanchnic circulation, effects of angiotensin on, in dogs, 857 (Abst.)
tissue of patients with cirrhosis, reduced ability to synthesize ATP of mitochondria isolated from, 184
Lung(s), aged and diseased, hexosamine and hydroxyproline content in human bronchial cartilage from, 78
disease, chronic, pulmonary hemodynamics in, effect of autonomic blockade on, 1012 (Abst.)
farmer's, pathogenicity of glycopeptide antigens in, 856 (Abst.)
and thoracic compliances in ankylosing spondylitis, 1015 (Abst.)
volumes, changes in, during breathing negative pressure continuously, during inspiration only, and during expiration only, 31
Lupus erythematosus sera, antibody to DNA in, specific nuclear reaction pattern, 625
systemic, hereditary factors in, 1001 (Abst.)
thrombosis in, despite circulating anticoagulants, 416
Lymphatic leukemia, passage A, incubation period, decreased antibody-producing capacity during, 878 (Abst.)
prevention in chicken by surgical removal of bursa of Fabricius, 1000 (Abst.)

M

Macroglobulinemia associated with high RA-factor activity, differentiation of "true" and "spurious," 1008 (Abst.)
and multiple myeloma, metabolism of normal 6.6S α-globulin in normal subjects and in patients with, 1
Mafenide and penicillin, topical, comparative duration of antibacterial effect on experimental wounds, 286
Magnesium absorption, 868 (Abst.)
Malignancy, anemia of, experimental studies in, effect of Freund's adjuvant and colloidal carbon on erythroagglutination reaction, 216
Mammalian ribosomes, inhibitory effect of chloramphenicol on, 1020 (Abst.)
Mean corpuscular hemoglobin concentration, effect on viscosity, 401
Megakaryocytes, normoblasts, and platelets, H substance, 1023 (Abst.)
6-Mercaptopurine, virus infection and therapy with, 1010 (Abst.)
Mesenteric and portal circulations of dogs, segmental resistance, local effects of vasoactive agents on, 1016 (Abst.)
Metabolic defects in muscle disease, 579
and hormonal changes of total starvation in obesity, 857 (Abst.)
products (methane) of expired air, 247
Metabolism, albumin, in aminonucleoside nephrotic rats, 910
carbohydrate, in patients with cirrhosis, 994 (Abst.)
glucose, in man, early effect of cortisol on, 431
lipid, in uncontrolled insulin-dependent diabetes, 855 (Abst.)
of normal 6.6S α-globulin in normal subjects and in patients with macroglobulinemia and multiple myeloma, 1
protein, in heart following myocardial infarction, 880 (Abst.)
sulfadiazine and isoniazid, in rabbit, genetic control, 891
testosterone, pituitary regulation by liver, 992 (Abst.)
Metabolites and ions, cellular, enzyme inhibition at levels found in severely malnourished children, 995 (Abst.)
Metastasis, bronchogenic, identification of two hormones in, concept of tumor as hormone "sponge," 1018 (Abst.)
Methemoglobinemia, chronic, effect on development of coronary collateral circulation, 874 (Abst.)
L-Methionine absorption from small intestine, 1011 (Abst.)
Methyl-DOPA and reserpine, mechanism of response, 869 (Abst.)

Microscopy, fluorescence, reticulocyte counts by means of, 132
Milk sensitivity, sudden unexpected death in infancy and, 477
Mitochondria isolated from liver tissue of patients with cirrhosis, reduced ability to synthesize ATP, 184
Mitochondrial oxidase activities of human liver, 883 (Abst.)
Mitral stenosis, pure, effect of exercise on left ventricular end-diastolic pressure in, 875 (Abst.)
with sinus rhythm, left atrial and left ventricular sound and pressure relationships in, 1022 (Abst.)
Mo^{99} (molybdate) as tracer, visualization of liver by scanning with, 330
Monosaccharides and oligosaccharides, rapid identification and measurement, adaptation of high-voltage paper electrophoresis for sugars and its application to biologic materials, 817
Mucoproteins and proteins, urinary, normal, column chromatography and immunoelectrophoretic anaylsis, 878 (Abst.)
Multiple myeloma, diagnosis and course, with survival estimations, 860 (Abst.)
and macroglobulinemia, metabolism of normal 6.6S α-globulin in normal subjects and patients with, 1
treatment, analysis of cyclophosphamide therapy, 990 (Abst.)
Muscle disease (human), glycogen, creatine, and high-energy phosphate in, 579
Myocardial biopsy, percutaneous, 859 (Abst.)
infarction, protein metabolism in heart following, 880 (Abst.)

N

Negative pressure, changes in lung volumes during breathing continuously, during inspiration only, and during expiration only, 31
Nephrons, residual, of chronically diseased kidney in dog, adaptive capacity, 1008 (Abst.)
Nephrosis, aminonucleoside, in rats, evidence against immune mechanism in, 103
mechanism, 853 (Abst.)
Nephrotic rats, aminonucleoside, albumin metabolism in, 910
syndrome, physiologic responses associated with steroid-induced diuresis in, 449
Nephrotoxic serum renal disease in Taiwan monkey, 201
Nitrofurantoin-induced hemolysis, 1002 (Abst.)
Nitrogen and fat fecal excretion in Wilson's disease (hepatolenticular degeneration), intake-excretion studies, 879 (Abst.)
zinc, and iron content of sweat in normal and deficient subjects, 84
Nonsmokers, cardiopulmonary responses to exercise, effects of carbon monoxide inhalation on, 867 (Abst.)
Normoblasts, megakaryocytes, and platelets, H substance, 1023 (Abst.)
Nuclear reaction pattern, specific, of antibody to DNA in lupus erythematosus sera, 625
Nucleic acid and protein determinations in experimental cardiomegaly, 632
synthesis and phagocytosis by HeLa cells, effect of anticellular serum on, 864 (Abst.)

O

Obesity, hormonal and metabolic changes during total starvation in, 857 (Abst.)
Oligosaccharides and monosaccharides, rapid identification and measurement, adaptation of high-voltage paper electrophoresis for sugars and its adaptation to biologic materials, 817
Oophorectomized and adrenalectomized patients, sodium and water excretion in, effects of angiotensin administration on, 862 (Abst.)
Osmolal threshold for vasopressin release in man, effect of hydrocortisone on, 997 (Abst.)
Ovarian function, age, and weight gain, physiologic factors influencing circulating triglyceride concentration in women, 437

P

Pancreatic juice, identification of components by paper electrophoresis, 867 (Abst.)
Pancreatitis, acute experimental, enzyme inhibition in treatment, 1013 (Abst.)
Paper electrophoresis, and preliminary immunoelectrophoretic analysis of paralbuminemia, 753
identification of pancreatic juice components by, 867 (Abst.)
Paralbuminemia, paper and cellulose acetate electrophoresis and preliminary immunoelectrophoretic analysis, 753
Passage A lymphatic leukemia, incubation period, decreased antibody-producing capacity during, 878 (Abst.)
Pathogenesis of intimal fatty streak lesion of human atherosclerosis, alteration of neutral lipids, 886 (Abst.)
Pathogenicity of glycopeptide antigens in farmer's lung, 856 (Abst.)
Penicillin allergy, human, comparison of various penicilloyl-polylysines, 482
and mafenide, topical, comparative duration of antibacterial effect on experimental wounds, 286
Penicilloyl-polylysines, comparison of various, studies in human penicillin allergy, 482
immunogenicity, 998 (Abst.)
Perfusion, direct, selective cholinergic stimulation and blockade of sinus node by, through its artery, 40
Peripheral vascular resistance, alteration by changing force of cardiac contraction, 859 (Abst.)
pH, blood, effect of alterations on digitalis toxicity, 53
duodenal, intraluminal and juxtamucosal, 861 (Abst.)

Phagocytosis and nucleic acid synthesis by HeLa cells, effect of anticellular serum on, 864 (Abst.)
Phenolsulfonphthalein (PSP) absorption, rectosigmoidal, in normal subjects and ulcerative colitis patients, 639
Phosphate (high-energy), glycogen, and creatine in human muscle disease, 579
Phosphonucleotides, maintenance in platelets by plasma medium, 1009 (Abst.)
Photography, motion picture, fluorescence, of retinal circulation, technique and normal retinal blood flow, 703
Physiologic observations on Pickwickian syndrome, use of rocking bed to prevent hypoxia, 870 (Abst.)
Pituitary regulation of testosterone metabolism by liver, 992 (Abst.)
Plasma clearance and whole body turnover of injected and absorbed radioactive vitamin B_{12} in man, 255
convalescent, nonicterogenic, prophylactic value of transfusions against serum hepatitis, 854 (Abst.)
free fatty acids, effect of insulin on, 646
and platelet-bound serotonin levels in connective tissue disease, platelet-serotonin–binding mechanism, 870 (Abst.)
human, antidiuretic titer, 279
simplified micromethod for measuring histamine in, 506
and leukemic leukocytes, comparative analysis of glycoprotein fractions, 961
lipids, effects of ethanol on, 675
medium, maintenance of phosphonucleotides in platelets, 1009 (Abst.)
method for assay of antidiuretic hormone in, 279
from normal and schizophrenic subjects, effect on oxidation of labeled glucose by chicken erythrocytes, 306
"thrombocythemic" and "polycythemic," thrombocytosis-promoting effects, 374
unesterified fatty acids and arterial blood carbon dioxide tension, 990 (Abst.)
and urinary radioactivity assayed by beta liquid scintillation spectrometry, platelet survival and, sulfur-35 studies in man, 109
volume, radiobromide space, exchangeable potassium, and exchangeable sodium, simple and precise method for simultaneous measurement in man, 492
Platelet(s) adhesiveness, measurement, demonstrating abnormality in von Willebrand's disease, 724
destruction, physiology, as revealed by tagging of cohorts, studies in dogs, 385
maintenance of phosphonucleotides in, by plasma medium, 1009 (Abst.)
normoblasts, and megakaryocytes, H substance, 1023 (Abst.)
phosphorus, recovery from serum after recalcification of platelet-rich plasma, 736
Platelet(s)—Cont'd
survival and plasma and urinary radioactivity assayed by beta liquid scintillation spectrometry, sulfur-35 studies in man, 109
studies, hydroxytryptamine, 887 (Abst.)
Platelet-bound and plasma free serotonin levels in connective tissue disease, platelet-serotonin–binding mechanism, 870 (Abst.)
Plethysmographic information, evidence for venous origin, 943
Pneumococcal infection, fatal, in rabbits, manifestations, 549
Polycythemic mouse, hypoxia-induced, use in assay and standardization of erythropoietin, 743
and "thrombocythemic" plasmas, thrombocytosis-promoting effects, 374
Porphobilinogen excretion, quantitative determination, detection of latent porphyrics by, 887 (Abst.)
Porphyrics, latent, detection by quantitative determination of porphobilinogen excretion, 887 (Abst.)
Portal hypertension, portopulmonary shunts in, 715
and mesenteric circulations of dogs, segmental resistance, local effects of vasoactive agents on, 1016 (Abst.)
Portopulmonary shunts in portal hypertension, 715
Potassium, exchangeable, plasma volume, radiobromide space, and exchangeable sodium, simple and precise method for simultaneous measurement in man, 492
sodium, chromate, and triiodothyronine, radioactive, some differences in erythrocyte composition and uptake associated with aging, 263
Polyinosinic acid, inhibition of complement by, 1022 (Abst.)
Pregnancy test by diamine oxidase titer in plasma, 699
Proliferative potential, limited, factor in agranulocytosis, 1000 (Abst.)
Progesterone, influence on amino acid utilization, 991 (Abst.)
Protein(s), blood, inherited variants, familial segregation of transferrin $B_{1-2}B_2$, 762
fractions, serum, of diabetic and normal subjects, insulin-like activity in, before and after glucose loading, 1003 (Abst.)
metabolism in heart following myocardial infarction, 880 (Abst.)
and mucoproteins, urinary, normal, column chromatography and immunoelectrophoretic analysis, 878 (Abst.)
and nucleic acid determinations in experimental cardiomegaly, 632
reabsorption, formation of lipid-protein complexes in renal epithelial cells in, 1001 (Abst.)
serum, on washed leukocytes, by means of fluorescent antibodies, demonstration, 18

Protein(s)—Cont'd
solutions, immunofluorescence applied to, 517
synthesis, exogenous and endogenous urea for, in normal and uremic subjects, 231
ribosomal, induced, inhibition by chloramphenicol, 1020 (Abst.)
Proteolysis, TSH-augmented, 1002 (Abst.)
Pulmonary emphysema, primary, in middle-aged women, 858 (Abst.)
function in sarcoidosis, 994 (Abst.)
hemodynamics, effect of autonomic blockade on, in chronic lung disease, 1012 (Abst.)
resection, extensive, exercise limitation following, 871 (Abst.)
veins, function in reversible and irreversible hemorrhagic shock and transfusion, 886 (Abst.)
Pyelonephritis, observations on treatment of enterococcal infection in nonobstructed kidney of rat, 90

Q

Quinidine, mechanism of action on sinus node studied by direct perfusion through its artery, 888 (Abst.)

R

Radiation injury, immunologic aspects, 1003 (Abst.)
Radioactive potassium, sodium, chromate, and triiodothyronine, some differences in erythrocyte composition and uptake associated with aging, 263
vitamin B_{12}, injected and absorbed, in man, plasma clearance and whole body turnover, 255
Radioactivity, plasma and urinary, assayed by beta liquid scintillation spectrometry, platelet survival and, sulfur-35 studies in man, 109
Radioiodine absorption, rectosigmoidal, in normal subjects and ulcerative colitis patients, 639
Radiobromide space, plasma volume, exchangeable potassium, and exchangeable sodium, simple and precise method for simultaneous measurement in man, 492
Radiocalcium absorption, relation to dietary calcium, 989 (Abst.)
Radioisotopes, use to measure body fluid constituents, urine sulfate, 710
RA-factor activity, high, differentiation of "true" and "spurious" macroglobulinemias associated with, 1008 (Abst.)
Rectosigmoidal absorption of phenolsulfonphthalein, sulfisoxazole diethanolamine, and radioiodine in normal subjects and ulcerative colitis patients, 639
Red blood cells, transfused, survival, hemolytic system associated with enteritis in rabbits, 559
Reference standard, composite, newly derived, normal calcium kinetics, 882 (Abst.)
Renal arterial infusion of acetylcholine, saliuresis and diuresis induced by, 991 (Abst.)
disease, nephrotoxic serum, in Taiwan monkey, 201
epithelial cells, formation of lipid-protein complexes in, in protein reabsorption, 1001 (Abst.)
hemodynamics, tubular excretion, and urine-concentrating capacity in essential hypertension, 787
and renoprival hypertension, 874 (Abst.)
Renoprival and renal hypertension, 874 (Abst.)
RES, kinetics, in normal and cirrhotic subjects, with colloidal denatured albumin labeled with I^{131}, 968
Reserpine and methyl-DOPA, mechanism of action, 869 (Abst.)
Reticulocyte counts by means of fluorescence microscopy, 132
Reticulocytes, human, globin synthesis in, 121
Reticuloendothelial system and intravascular hemolysis, role in production of hypercoagulable state, 1005 (Abst.)
kinetics, in normal and cirrhotic subjects, with colloidal denatured albumin labeled with I^{131}, 968
Retinal circulation, fluorescence motion picture photography of, 703
Rhinovirus infections, antibody response to, 868 (Abst.)
Ribosomal protein synthesis, induced, inhibition by chloramphenicol, 1020 (Abst.)
Ribosomes, mammalian, inhibitory effect of chloramphenicol on, 1020 (Abst.)
Rocky Mountain spotted fever after aerogenic infection, 1011 (Abst.)
Rubella virus vaccine, inactivated, 1015 (Abst.)
Rumination, esophagus in, 1021 (Abst.)
Runt disease, participation of small bowel in, 1007 (Abst.)

S

Saliuresis and diuresis induced by renal arterial infusion of acetylcholine, 991 (Abst.)
Salt-induced hypercholesterolemia, 854 (Abst.)
Sarcoidosis, pulmonary function in, 994 (Abst.)
Scanning with Mo^{99} (molybdate) as tracer, visualization of liver by, 330
Schizophrenia, behavioral manifestations in, studies on correlation of glucose-6-phosphate dehydrogenase deficiency with, 319
Schizophrenic and normal subjects, effect of plasma from, on oxidation of labeled glucose by chicken erythrocytes, 306
Schöniger technique, modified, liquid scintillation counting of C^{14}-labeled hemoglobin and hemin by, 511

Scintillation spectrometry, beta liquid, platelet survival and plasma and urinary radioactivity assayed by, sulfur-35 studies in man, 109
Seasonal sickness, man-made, 1005 (Abst.)
Segmental resistance of mesenteric and portal circulations of dogs, local effects of vasoactive agents on, 1016 (Abst.)
Serotonin levels, plasma free and platelet, in connective tissue disease, platelet-serotonin–binding mechanism, 870 (Abst.)
Serum, amine oxidase in, 766
anticellular, effect on phagocytosis and nucleic acid synthesis by HeLa cells, 864 (Abst.)
benzidine-positive pigments in sickle cell anemia, 950
bile, and urine, fluorometric determination of biliverdin in, 141
complement, persistence, in sera of patients with ulcerative colitis, 24
cord, of newborn, maternal, and paternal, relationship of influenza antibody pattern, 862 (Abst.)
hepatitis, prophylactic value against, of transfusions of nonicterogenic convalescent plasma, 854 (Abst.)
human, *Escherichia coli* bactericidal rate, inhibition by wide-spectrum antibiotics, 1020 (Abst.)
lipoproteins and cholesterol deposition in aortic wall of cholesterol-fed chick, 889 (Abst.)
lupus erythematosus, antibody to DNA in, specific nuclear reaction pattern, 625
renal disease, nephrotoxic, in Taiwan monkey, 201
proteins, demonstration, on washed leukocytes by means of fluorescent antibodies, 18
fractions of diabetic and normal subjects, insulin-like activity in, before and after glucose loading, 1003 (Abst.)
in ulcerative colitis, persistence of serum complement in, 24
vitamin B_{12} binding capacity, in B_{12} deficiency, 882 (Abst.)
Shock, reversible and irreversible, function of pulmonary veins in hemorrhagic, and transfusion, 886 (Abst.)
Shrinkage temperature and isometric contraction of skin collagen in relation to age and pathologic conditions, 1006 (Abst.)
Sickle cell anemia, serum benzidine-positive pigments in, 950
theory of cause of crises in, 883 (Abst.)
Sinus node, blockade, by direct perfusion through its artery, selective cholinergic stimulation and, 40
Sinus node artery, retrograde pressure in, relation to sinus tachycardia from stellate stimulation, 777
mechanism of action of quinidine on, studied by direct perfusion through artery, 888 (Abst.)
Sinus—Cont'd
rhythm, mitral stenosis with, left atrial and left ventricular sound and pressure relationships in, 1022 (Abst.)
Skin collagen, shrinkage temperature and isometric contraction, related to age and pathologic conditions, 1006 (Abst.)
Small bowel, participation in runt disease, 1007 (Abst.)
intestine, kinetics of L-methionine absorption from, 1011 (Abst.)
mucosa, serial observations of structure in Whipple's disease, 1017 (Abst.)
Sodium, exchangeable, plasma volume, radiobromide space, and exchangeable potassium, method for simultaneous measurement in man, 492
potassium, chromate, and triiodothyronine, radioactive, some differences in erythrocyte composition and uptake associated with aging, 263
and water excretion, effects of angiotensin administration on, in adrenalectomized and oophorectomized patients, 862 (Abst.)
Spectrometry, beta liquid scintillation, platelet survival and plasma and urinary radioactivity assayed by, sulfur-35 studies in man, 109
Splanchnic circulation and liver, effects of angiotensin on, in dogs, 857 (Abst.)
Spleen, mouse, acid deoxyribonuclease from, digestion of calf thymus deoxyribonucleic acid by, 885 (Abst.)
role in acetylphenylhydrazine (APH) anemia in rats, 59
Splenic extract, detoxification of *Escherichia coli* lipopolysaccharide by, 881 (Abst.)
Spondylitis, ankylosing, lung and thoracic compliances in, 1015 (Abst.)
Sporotrichosis, rapid diagnosis, fluorescent antibody technique applied to, 835
Staphylococcal infections, experimental, immunity in, 535
Starvation, effect on urinary fat metabolizing activity, 861 (Abst.)
total, in obesity, hormonal and metabolic changes, 857 (Abst.)
Stellate stimulation, sinus tachycardia from, relation of retrograde pressure in sinus node artery to, 777
Steroid treatment of infectious mononucleosis, 1018 (Abst.)
Steroid-induced diuresis in nephrotic syndrome, physiologic responses associated with, 449
Streptokinase, immunologic and physical differences in, 872 (Abst.)
Sulfadiazine acetylation in rabbit livers, genetically controlled, possible identification of heterozygous trait, 905
and isoniazid metabolism in rabbit, genetic control, 891
Sulfisoxazole diethanolamine (Gantrisin) absorption, rectosigmoidal, in normal subjects and ulcerative colitis patients, 639

Sulfur-35 studies in man, platelet survival and plasma and urinary radioactivity assayed by beta liquid scintillation spectrometry, 109
Supravalvar aortic stenosis, genetic and clinical studies, 995 (Abst.)
Survival estimations, in multiple myeloma, 860 (Abst.)
Sweat, zinc, iron, and nitrogen content, in normal and deficient subjects, 84
Syndrome, Pickwickian, physiologic observations on, use of rocking bed to prevent hypoxia, 870 (Abst.)
Synovial fluid, enzyme activity in, 175
Systemic and coronary hemodynamics in aortic valve disease, 1010 (Abst.)
and local hemodynamic effects, acute, of hypertonicity, 876 (Abst.)
lupus erythematosus, hereditary factors in, 1001 (Abst.)
thrombosis in, despite circulating anticoagulants, 416

T

Tachycardia, sinus, from stellate stimulation, relation of pressure in sinus node artery to, 777
Tagging of (platelet) cohorts, physiology of platelet destruction as revealed by, 385
Temperature and hydrogen ion concentration, effect on erythrocyte adenosine triphosphate preservation, 860 (Abst.)
Testosterone metabolism, pituitary regulation by liver, 992 (Abst.)
Testosterone-induced remission in patients with acquired and constitutional aplastic anemia, morphologic and biochemical characteristics of erythrocytes in, 294
Tetracycline fluorescence of gastric washings, diagnosis of bronchogenic carcinoma based on, 992 (Abst.)
Thoracic and lung compliances in ankylosing spondylitis, 1015 (Abst.)
Thrombi, structure produced by injections of fatty acids, 884 (Abst.)
Thrombin, amine release by, 871 (Abst.)
Thrombopoiesis, studies, thrombocytosis-promoting effects of "thrombocythemic" and "polycythemic" plasmas, 374
Thrombosis in systemic lupus erythematosus despite circulating anticoagulants, 416
Thymectomized rats, immunologic competence against bacterial antigen in, 856 (Abst.)
Thymus, calf, deoxyribonucleic acid, digestion by acid deoxyribonuclease (DNase II) from mouse spleen, 885 (Abst.)
Thyroid hormones, ion-exchange paper chromatography, 831
Tissues and fluids, body, quantitative determination of *d*-tubocurarine in, 979
Toxicity, digitalis, effect of alterations of blood pH on, 53
Transferrin B_{1-2} B_2, familial segregation, inherited variants of blood proteins, 762
Transfusion and reversible and irreversible hemorrhagic shock, function of pulmonary veins in, 886 (Abst.)
Transketolase activity of human arterial and venous tissue, 989 (Abst.)
Triglyceride concentration, circulating, in women, physiologic factors influencing age, weight gain, and ovarian function, 437
medium chain-length, effects in hyperchylomicronemia (dietary fat–induced hyperglyceridemia), a type of familial hyperlipemia, 876 (Abst.)
Triiodothyronine, potassium, sodium, and chromate, radioactive, some differences in erythrocyte composition and uptake associated with aging, 263
TSH-augmented proteolysis, evidence, 1002 (Abst.)
d-Tubocurarine in body tissues and fluids, quantitative determination, 979
Tumor, concept as hormone "sponge," identification of two hormones in bronchogenic metastasis, 1018 (Abst.)
Tumorigenesis inhibition in C_3H mice, 864 (Abst.)

U

Ulcerative colitis, idiopathic, rectosigmoidal absorption of phenolsulfonphthalein, sulfisoxazole diethanolamine, and radioiodine in, 639
persistence of serum complement in sera of patients with, 24
Ultrastructure and enzyme activities in kidneys of rats with aminonucleoside nephrosis, correlation, 996 (Abst.)
Unesterified fatty acids, plasma, and arterial blood carbon dioxide tension, 990 (Abst.)
Urea, exogenous and endogenous, use for protein synthesis in normal and uremic subjects, 231
Urinary and plasma radioactivity assayed by beta liquid scintillation spectrometry, platelet survival and, sulfur-35 studies in man, 109
proteins and mucoproteins, normal, column chromatography and immunoelectrophoretic analysis, 878 (Abst.)
tract infection and bacteriuria incidence in women with diabetes, 997 (Abst.)
zinc excretion in syndrome of anemia, hepatosplenomegaly, dwarfism, and hypogonadism, 591
Urine, automated method for D-xylose determination in, 341
and blood containing inulin, use of gel filtration to remove chemically interfering glucose from, 501
fat metabolizing activity, effect of starvation on, 861 (Abst.)
serum and bile, fluorometric determination of biliverdin in, 141
sulfate, use of radioisotopes to measure, 710

Urine-concentrating capacity, renal hemodynamics, and tubular excretion in essential hypertension, 787

V

Vaccine, rubella virus, inactivated, 1015 (Abst.)
Vascular resistance, mechanical factors in, 1009 (Abst.)
peripheral, alteration by changing force of cardiac contraction, 859 (Abst.)
Vasoactive agents, local effects on segmental resistance of mesenteric and portal circulations of dogs, 1016 (Abst.)
Vasopressin release in man, osmolal threshold for, effect of hydrocortisone on, 997 (Abst.)
Veins, pulmonary, function in reversible and irreversible hemorrhagic shock and transfusion, 886 (Abst.)
Venous and arterial tissue, human, transketolase activity, 989 (Abst.)
origin of plethysmographic information, evidence for, 943
Ventricular and atrial, left, sound and pressure relationships in mitral stenosis with sinus rhythm, 1022 (Abst.)
Viruria, biologic significance studied with herpes simplex infection of mice, 1013 (Abst.)
Virus(es), cytopathic, disc method for identification and titration, and detection of antibodies resulting from their infection, 525
infection and therapy with 6-mercaptopurine, 1010 (Abst.)
latent, isolation from kidney of newborn human, 872 (Abst.)
vaccine, rubella, inactivated, 1015 (Abst.)
Viscosity of whole blood, effect of mean corpuscular hemoglobin concentration, 401
Vitamin B_{12} binding capacity of serum in B_{12} deficiency, 882 (Abst.)
Vitamin B_{12}—Cont'd
deficiency, B_{12} binding capacity of serum in, 882 (Abst.)
injected and absorbed radioactive, plasma clearance and whole body turnover, 255
protection of intrinsic factor by, 853 (Abst.)
von Willebrand's disease, abnormality in, demonstrated by technique for measuring platelet adhesiveness, 724

W

Water and sodium excretion, effects of angiotensin administration on, in adrenalectomized and oophorectomized patients, 862 (Abst.)
Weight gain, age, and ovarian function, physiologic factors influencing circulating triglyceride concentration in women, 437
Whipple's disease, serial observations of small intestine mucosa in, 1017 (Abst.)
Wide-spectrum antibiotics, inhibition of *Escherichia coli* bactericidal rate of human sera by, 1020 (Abst.)
Wilson's disease, fecal excretion of fat and nitrogen in, intake-excretion studies, 879 (Abst.)
Wounds, experimental, comparative duration of antibacterial effect of topical penicillin and mafenide on, 286

X

D-Xylose, determination in urine by automatic chemical analysis, 341

Z

Zinc excretion, urinary, in syndrome of anemia, hepatosplenomegaly, dwarfism, and hypogonadism, 591
iron, and nitrogen content of sweat in normal and deficient subjects, 84
